RISK REGULATION AND THE LINKS TO REGULATORY POLICY

Nick Malyshev
Head of the Regulatory Policy Division, OECD

Improving Risk Regulation: From Crisis Response to Learning and Innovation

13-14 October 2014
OECD, Paris
Devising regulations is rarely straightforward
- technical complexities, uncertainties, political constraints, unintended consequences, collateral damage, excessive cost and not serve policy goals at all

Inherent risks to good regulatory outcomes
- lack of evidence to inform policy development
- use regulation to solve problems for which regulation is not suited
- rent seeking behaviour on behalf of incumbents,
- status quo bias - the reluctance to review and reform policy areas
- Falling through the cracks

Considerable costs when things to go wrong...
- Loss in economic performance or societal wellbeing
- Adverse political consequences for governments themselves
Government efforts to improve regulations and policy outcomes

A problem of definition...or of identity?

- Deregulation, Paperwork Reduction, Regulatory Management, Quality Regulation, Regulatory Governance, Regulatory Improvement, Good Regulatory Practice, Better Regulation, Smart Regulation, Regulatory Fitness

For the OECD, “Regulatory Policy” seeks to improve public policy outcomes by changing the way governments design and deliver regulation.

Regulatory policy is not a better business agenda. It’s about making markets work better

Regulatory policy is responsible for some less tangible but equally critical public governance outcomes
## OECD approach to regulatory policy and governance
